PROJECTS

Admin Dashboard

Responsive Admin Management Dashboard.

A responsive task management application built with React and Vite, designed to provide a simple and intuitive way to manage daily tasks. Users can add new tasks, mark tasks as completed, and manage their task list through a clean and straightforward interface. The application focuses on usability, responsive design, and efficient state management using React.

04/2026 – 06/2026

E-Commerce

Interactive & Responsive Shopping Experience.

A complete and responsive e-commerce web application designed to provide a smooth and intuitive shopping experience. Users can easily browse and discover products, search for specific items, view product details, manage their shopping cart, and proceed through a clear checkout flow. The application focuses on simple navigation, responsive layouts, and a consistent user experience across desktop, tablet, and mobile devices.

02/2026 – 03/2026

Job Board

09/2025 – 10/2025

Interactive Job Search & Discovery Platform.

A responsive job search platform designed to provide a smooth and intuitive experience for discovering and exploring job opportunities. Users can browse available positions, search for specific roles, filter results by relevant criteria, and view detailed job information through a clear and structured interface. The application focuses on responsive design, efficient navigation, reusable React components, and seamless interaction across different screen sizes.
